Great catch by Linda.

The following record was published by the TSCA program for the 2006 reporting cycle and may have been reported to EPA incorrectly.

Ex. 5 Deliberative Process (DP)

FYI – This record was presented in the map as in Coshocton, OH.

Given all other parts of this record, including lat/long, indicate the site is in OH, we will a) assume that OPPT will not be updating historical reporting and will change the Site_State value from AK to OH in our files, which will be updated, along with the new NCCT chemical list, and loaded into Qlik by early next week.

FYI – one of the CDR facilities is listed as AK but the location is in Ohio...

Hi Andy,

I've got my Regional program PFAS folks looking at the database. I did want to let you know that the Ex. 6 Personal Privacy (PP) **Ex. 5 Deliberative Process (DP)** is not located in our Region (looks like it's in Ohio instead).

Subject: Second instance: Discussion re: the PFAS data calls (Regional Places of Interest, and the PFAS Data Inventory)

Colleagues, I just sent an update for this meeting, adding the link to the current draft PFAS geospatial tool so you can see what locations are already in the system.
Below is the updated note added to the invite.

Best regards, Andy

Colleagues – as noted, this call will continue the discussion on the Regional Places of Interest (first spreadsheet below).

Here is a link to the current working draft of the PFAS Data Explorer: [National PFAS Data Explorer](#)

If you click on the “Integrated map” tab you can see a map of the PFAS places currently in our system. Click on the other tabs (drinking water, federal sites) to see certain classes of PFAS places.

What we are trying to do with this regional data call is to make sure that we include places of known EPA PFAS activity which are NOT captured on other layers.

We are starting with the list of places that regions provided for another purpose last year (spreadsheet below). asking you to add and delete from that to make the list of places you want to be sure are included. We’ll do a simple demo for those who want to follow along, go to Adobe at: Ex. 6 Personal Privacy (PP)
